

### Introduction

HE500 series temperature and humidity transmitter adopt Switzerland imported 2 in 1 sensor, the output it provides including voltage, current and modbus .etc. Its unique design cools the device effectively and avoids signal jamming. With built-in high performance, lower power SCM, it provides wide range and high precision measurements. Its power supply can be DC 9V ~ 30V. This series of products is an industrial grade product, which is designed for strong electromagnetic interference environment. It is specially designed for fast transient pulse group, electrostatic discharge, and withstand voltage. The sensor can accurately measure the temperature and humidity within the range of -30~70°C and 0~100%RH. The circuit uses temperature compensation and the product works stably and reliably.

External sensor

#### Features:

- Imported high-precision temperature and humidity integrated sensor.
- Professional industrial design, avoid test influence caused by circuit heating.
- Standard output: 4~20mA/0~5V/0~10V.
- Patented construction technology, easy to install and easy to maintain.
- High precision, stable consistency protection performance.
- Key board with set up & calibration function.
- Sound&light alarm when exceed the setting.

#### Technical Specifications

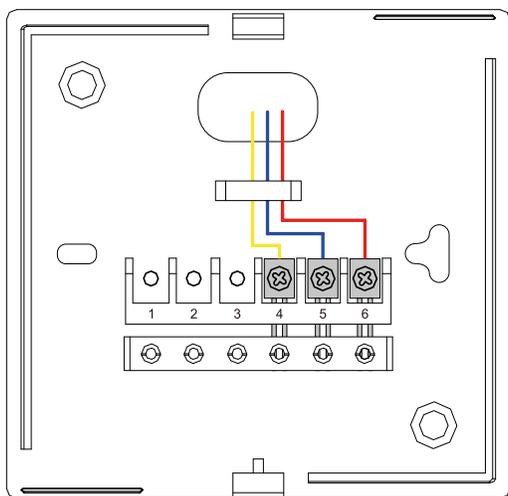

Resolution	Temperature: 0.1°C Humidity: 0.1%RH
Power supply	9V-30V DC
Product dimension	100x100x30mm(3.94x3.94x1.29 inch)
LCD size	60x40mm (2.36x1.57 inch)
Weight	200g
Accessories	User manual, Screw
Certification	CE/RoHS

#### Model List
