4.MEASURING PROCEDURE

4-1 Moisture content

- Hold the handle of measurement needles and leave needles in the air, i.e. don't let needles touch anything except air.
- Set the Function Switch to the MC (Moisture Content) position to switch on the power supply.
- You will hear 2 times of click sound. That is self-calibration by the instrument.
- Insert two steel measurement needles into the wood to be measured. The reading on the Display is the measurement value.

4-2 Temperature

- Set the Function Switch to the Temp. position to switch on the power supply.
- There is no need to insert the needles into the wood. The reading on the Display is the measurement value of environment temperature.
- It takes a few minutes to stabilize when conditions or environment are changed.
